This MA has an end date of 9/30. Any work beyond 9/22 will be subject to 90% cost share and in order for the State Cost Share bill to be calculated properly we will need to issue new MAs on 9/22 through 9/30.

Hope that clarifies.
Stacy

Hey Steve,

I would look at it this way: whatever you plan to bill for, needs to be done by the 22nd. I don't believe we allow for anything billed on dates after the end date.
Do you need to extend the end date?

As you know, under our existing MA, we are collecting orphaned containers, taking them to a pad, and then disposing of them...

Let's assume the state decides that after 09/22 (the cut-off for the 1005) that we are done...

Do we have to be completely done with our work and be completely demobed by the end of the 22nd... or as long as we are no longer collecting containers, but it takes a 2-3 days after the 22nd to actually dispose of the containers and clean

up the pad area (confirmation sampling, remove equipment, etc), and demobe our contractors, would that work stay under 100% or would it switch to 90%.

Obviously that would affect when we need to actually stop collection work if we have to be completely out by the end of the 22nd ??

As always, thanks for your opinions and guidance...

With Regards, Steve
